PROTECTACRETE S: penetrating water repellent sealer

PROTECTASEAL S: penetrating water & oil repellent (stain-proof) sealer

PROTECTASEAL ENHANCER S: penetrating water & oil repellent (stain-proof) & surface colour enhancing sealer (provides a permanent wet look)

If paving around BBQ or food areas you may find it best to use Protectaseal as it is also an oil repellent. Before purchasing please discuss your needs with Techdry to determine the best solution for your project.

### **Paving Notes**

Ligna Stone pavers are laid the same as conventional concrete pavers. If laying in mortar, please note there may be a small amount of shrinkage which needs to be allowed for when considering the joints. A 400mmx400mm paver may shrink approx. 1 to 2mm. We typically make to order and I would allow for about 3 weeks until they are ready for delivery. We recommend using a solvent

based sealer which will work better than a water based one. We have identified the following sealers from Techdry as a solution.
